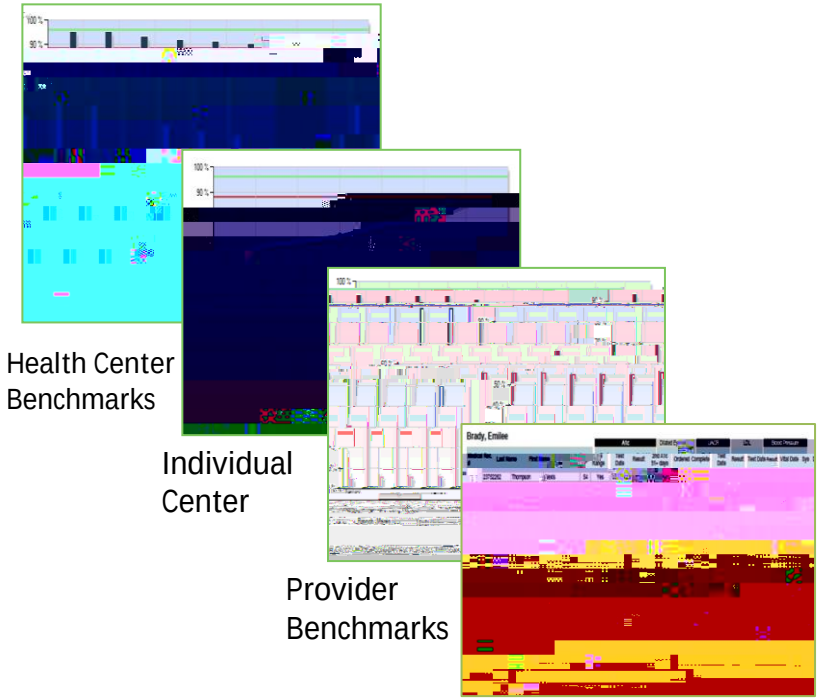
-

Welcome

- Clinical Quality Improvement and Health IT Committees of the

CPCI Technology and Data Quality - Overview

Multiple Data Views



Health Center Benchmarks

Individual Center

Provider Benchmarks

Actionable Patient Detail

Data Flows Into CPCI

Data is available in CPCI front-end, a web-based reporting platform accessible from any major browser

Data is mapped according to health center-specific business rules, and unified in EHR-agnostic Data Warehouse.

What is data quality?

High Level Steps

2. Select Patient Sample for Data Validation

- Drill into the measure to select data to validate in more detail (e.g., look at a provider011(7ith mae)-2iny pdatien-8(se)-1(qu(alf)-5ying( )-4(f)02(ora (meas

2. Select Patient Sample for Data Validation (cont)

Data Validation (cont)

3. Compare CPCI Data to EHR

4. Addressing Issues

4. Addressing Issues (cont.)
