### Objectives of Webinar

This Telehealth 101 webinar will educate New York State's Health Center Program grantees about the state law, enacted January 1, 2016, requiring payment parity for telehealth services. Participants will get an overview of telehealth benefits through the experiences of an upstate New York health center that has emerged as a national leader in telehealth. To explain how to build a solid telehealth program, the presentation will define telehealth and provide information on equipment, best practices, workflow integration, and reimbursement. Data illustrating successful use will also be shared.

### Target Audience

Health Center Program grantees, public health professionals, and stakeholders in New York State are invited to participate. There will be an opportunity for questions and answers after the presentation.
