## What's our mission?

**To increase HPV vaccination rates among males and females in the Capital Region.**

Join public health professionals, health care providers, and other patient care advocates to discuss best practices and opportunities, and learn what role individuals and organizations can play to increase HPV vaccine rates. Also hear about the impact of HPV-related cancers from survivors and healthcare professionals.

1

### LEARN

Evidence-based strategies and best practices to increase HPV vaccination coverage

2

### PROMOTE

Methods to overcome barriers, and challenges to achieve increased HPV vaccination coverage

3

### COLLABORATE

With healthcare professionals and patient care advocates to leverage opportunities to increase prevention
