# CM 03 Tips

1. First Step – Select clinical risk factors that are easily pulled from the database
2. Second Step – Make the first cut
3. Third Step - Review Result and refine reporting
4. Repeat Steps 1 -3 until you are satisfied with the results

❖ High risk patients should represent less than 5 – 10% of your total population

## CM 03 Tips Policy and Procedure

- At minimum annually, patients risk factors are reviewed and updated by the designated care team member
- Or with anytime there is a change in condition – based on the risk factors determined to be appropriate defined by the practice
- Reports are pulled quarterly by (?) and reviewed by (?)
- Actions are taken when X by X or referred to X for further
