

Christine Chim, PharmD, BCACP
Assistant Professor, Clinical Health Professions
St. John's University
College of Pharmacy & Health Sciences

Ambulatory Care Clinical Pharmacist
Northwell Health

Dr. Christine Chim is an Assistant Professor for the Department of Clinical Health Professions at her alma mater, St. John's University, College of Pharmacy and Health Sciences, where she received her PharmD. She completed a one-year postgraduate residency with Northeastern University/Harbor Health Services, Inc. in Boston, Massachusetts, where she trained to be an ambulatory care pharmacist at a Federally Qualified Health Center and PACE (a Medicare program for elderly patients). She practiced at another FQHC the subsequent year in a different part of Massachusetts before moving back to New York. During her first two and half years with St. John's University, Dr. Chim's clinical practice site was the Family Health Center of Harlem, one of the FQHCs with the Institute for Family Health, where she primarily ran an anticoagulation service, worked closely with the diabetes management team, conducted quality improvement projects focused on diabetes care and blood pressure control, and provided pharmacotherapy training for family medicine residents. Currently, she provides similar services as a Board Certified Ambulatory Care Pharmacist within a faculty practice of the Division of General Internal Medicine at Northwell Health. She serves as a preceptor for pharmacy students on their ambulatory care rotation, in which they provide education to patients about their disease states and medications. Her current research interests include interprofessional education, pharmacist-run home visits, medication adherence, and healthcare disparities in underserved communities.
